MACHINERY EXPORTERS ASSOCIATION

Machinery Exporters' Association was established in 2002 in order to coordinate all kinds of activities that will increase Turkish exports while gathering all machinery exporters under the same organization has approximately 13.000 members. It is the only establishment where the machinery exporters are represented in Turkey.

Turkey is the 18th largest economy in the world and the 6th biggest economy in Europe, according to GDP figures (at PPP) in 2018. GDP, which was USD 200 billion in 2001, more than tripled and reached USD 851 billion by 2018. GDP per capita in Turkey which was USD 3.500 in 2002 soared to USD 10.546 in 2017.

Rising Sector of Turkey: MACHINERY

Production in the Turkish machinery sector more than doubled in 10 years. With its rapid development and the potential it has, the Turkish Machinery Sector is a sector increasing its share in the Turkish economy and exports. The share of Turkish machinery export is 10,2% in Turkey's total export. Machinery is the second largest sector in Turkey's export.

Turkey exports to more than 200 countries (including free zones). By the year 2023, Turkish machinery aims to double their share in Turkey's total export.

ABOUT ASTEKNIK:

In Bursa Asteknik A.S has served in infrastructure market since 1976 and entered to valve manufacturing business by producing the first Asteknik brand butterfly valve in 1988. At the present time besides butterfly valves, check valves, dismantling joints, knife gate valves, needle valves and elastomer gaskets are in the product portfolio between the dimensions of DN25-DN3000 and pressure ratings of PN 6-10-16-25-40-63 with different material alternatives. All these valves are produced in factory located in Bursa in 13000 m2 closed area.

1976 First started its journey with project designing
1980 Wholesaling to the construction and armature markets
1985 First butterfly valve production in Bursa
1997 New factory in M.K.Pasa-Bursa with 2500 m2 closed area
2000 Growth in sales and production
2003 New production area with 5000m2 closed area
2008 Total 8000m2 production area.
2010 New production area for big valves with 5000 m2closed area.

QUALITY CERTIFICATES:

ISO 9001, ISO 14001, Conformite European (CE), WRAS

EXPORT PRODUCTS:

Butterfly Valve, Check Valve, Needle Valve, Knife Gate Valve, Dismantling Joint, Elastomer Gasket

ABOUT ERMAKSAN:

Ermaksan is a leading industrial organization that shapes the sheet metal processing machines sector with its strong R&D that produces high-quality machines with high technology with more than its 800 qualified staff in its modern production facilities extending to an area of 96.000 m2. In a 10.000 m2 field, it continues to carry out future oriented R&D works such as Fiber laser, Press Brake, Shearing, punching and Plasma machines, new machine models; Industry 4.0 applications and 3D printer (additive manufacturing) machine. The machines produced by Ermaksan now operate in 110 countries. Continuously following the new trends and customer expectations, and designing and producing machines with advanced technology, high added value, that are environment friendly and energy saving, Ermaksan takes firm steps forward on the way of sustainable growth by using resources effectively and efficiently.

Quality principle of ERMAKSAN requires to sustain current quality standards of the company by maximizing satisfaction of all customers throughout the world, meeting expectations of our partners and maintaining perfectionist quality culture without tarnishing the image of ERMAKSAN. Our company policy is make our employees to adopt corporate quality awareness and study in integration with the system. This principle also refers to continuous innovation and development, as fundamentals of corporate culture.

EXPORT PRODUCTS:

Sheet Metal Working Machineries, Fiber Laser, Press Brake, Shearing Machine, Punching Machine, Plasma Machine, 3D Printing Machine, Fiber Laser Resonator, CNC Controller, FPG Sensor

LayneBowler
TASTE THE ENGINEERING

ABOUT LAYNE BOWLER:

Layne Bowler history can be traced back to 1882 when the inventor Mr. M. Layne introduced the first vertical turbine to the world. This was a kind of revolution in the pump industry to get the water out from underground. Today and since 1965, in Ankara, on 42.000 m2 area, Layne Bowler distinguished engineers are working together in smooth and wonderful harmony; from sales to technical, R&D and production departments, all are using the latest technologies such as software, computerized and numerically controlled machines and machine tools to build and sell all kind of pumps. Layne Bowler is producing vertical turbines, submersible and line-shaft deep well pumps, sewage, geothermal, double suction split case, horizontal multistage and norm pumps.

Layne Bowler is manufacturing Engineering Pumps for big capacities and contracting business on turnkey projects basis. We can say also that Layne Bowler is building all kinds of "Tailor Made" Engineering Pumps. The suppliers of such Engineering Pumps are very few in the world; therefore there is no borders or limits for Layne Bowler's market. Today, Layne Bowler is exporting its standard and engineering pumps to Europe, Asia, Australia, Africa and America. Let us Taste the Engineering by choosing Layne Bowler pumps.

QUALITY CERTIFICATES:

Hydraulic Excellence

ABOUT MILES:

Miles Havacılık A.Ş. has been manufacturing Aircraft Catering Vehicles, Aircraft Cabin Cleaning Vehicles, Aircraft Ambulift Vehicles, Scissor Aircraft Maintenance Platforms, Airport Ground Support Equipment and Other Airport Ground Support Vehicles since 2013. Every High Loader product group we offer to the aviation sector is CE certified and production is completed according to European Machinery Directives. Load Lifts, Scissor Platforms, Hydraulic Ramps, Tail lift Platforms, Tailgate Hydraulic Lifts, Vehicle Type Disabled Lifts and Building Type Disabled Lifts are manufactured under the umbrella of Miles Lift A.Ş. Miles brand lifts are renowned for being long lasting products. As listed in our references, Miles brand lifts are the first choice of the largest retail stores. Every load lift product leaving our factory is CE certified and completed according to European Machinery Directives with high level quality control. Under the frame of the company, Miles Makine A.Ş. manufactures vehicle recovery and towing systems and carries out project-based works. Eurolift Systems, Sliding Platform Recovery Systems, Crane Equipped Lift Away System are some of them. In addition to these manufactured products, Miles Makine A.Ş. continues to represent some respected brands of European origin in Turkey. All three companies have ISO 2015 quality management certificate and every manufactured product by these companies is subjected to static and dynamic tests as required by CE Machinery Safety Directives and quality control is carried out at the highest level.

QUALITY CERTIFICATES:

ISO 9001, CE, EN ISO 3834-2, EN 15085-2
